Our year together

Across the **53** Events that have been held at Jesmond Dene parkrun a total distance of **69,605km** (registered finishers covered - 64,900km) has been run, walked and even pushed by our **6,232** fantastic participants all cheered along by can average **31** outstanding volunteers (**404** people).

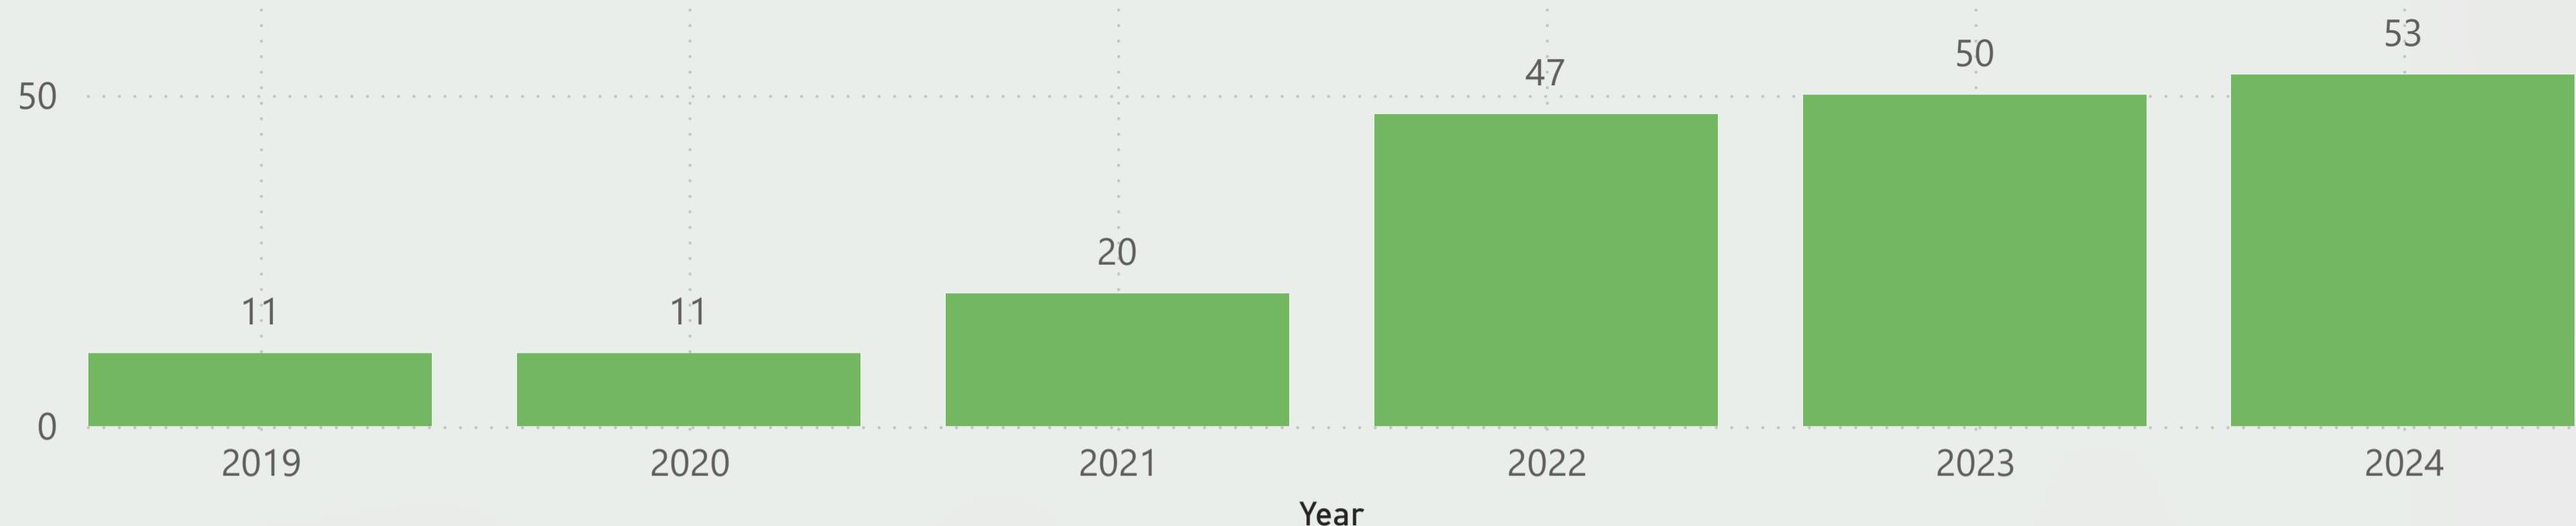

Event Performance

Between 2022 and 2024 we have likely found the "normal" level that Jesmond Dene parkrun should aim for in terms of number of events. We will target 51 for 2025, but conditions willing should be able to have 53 again.

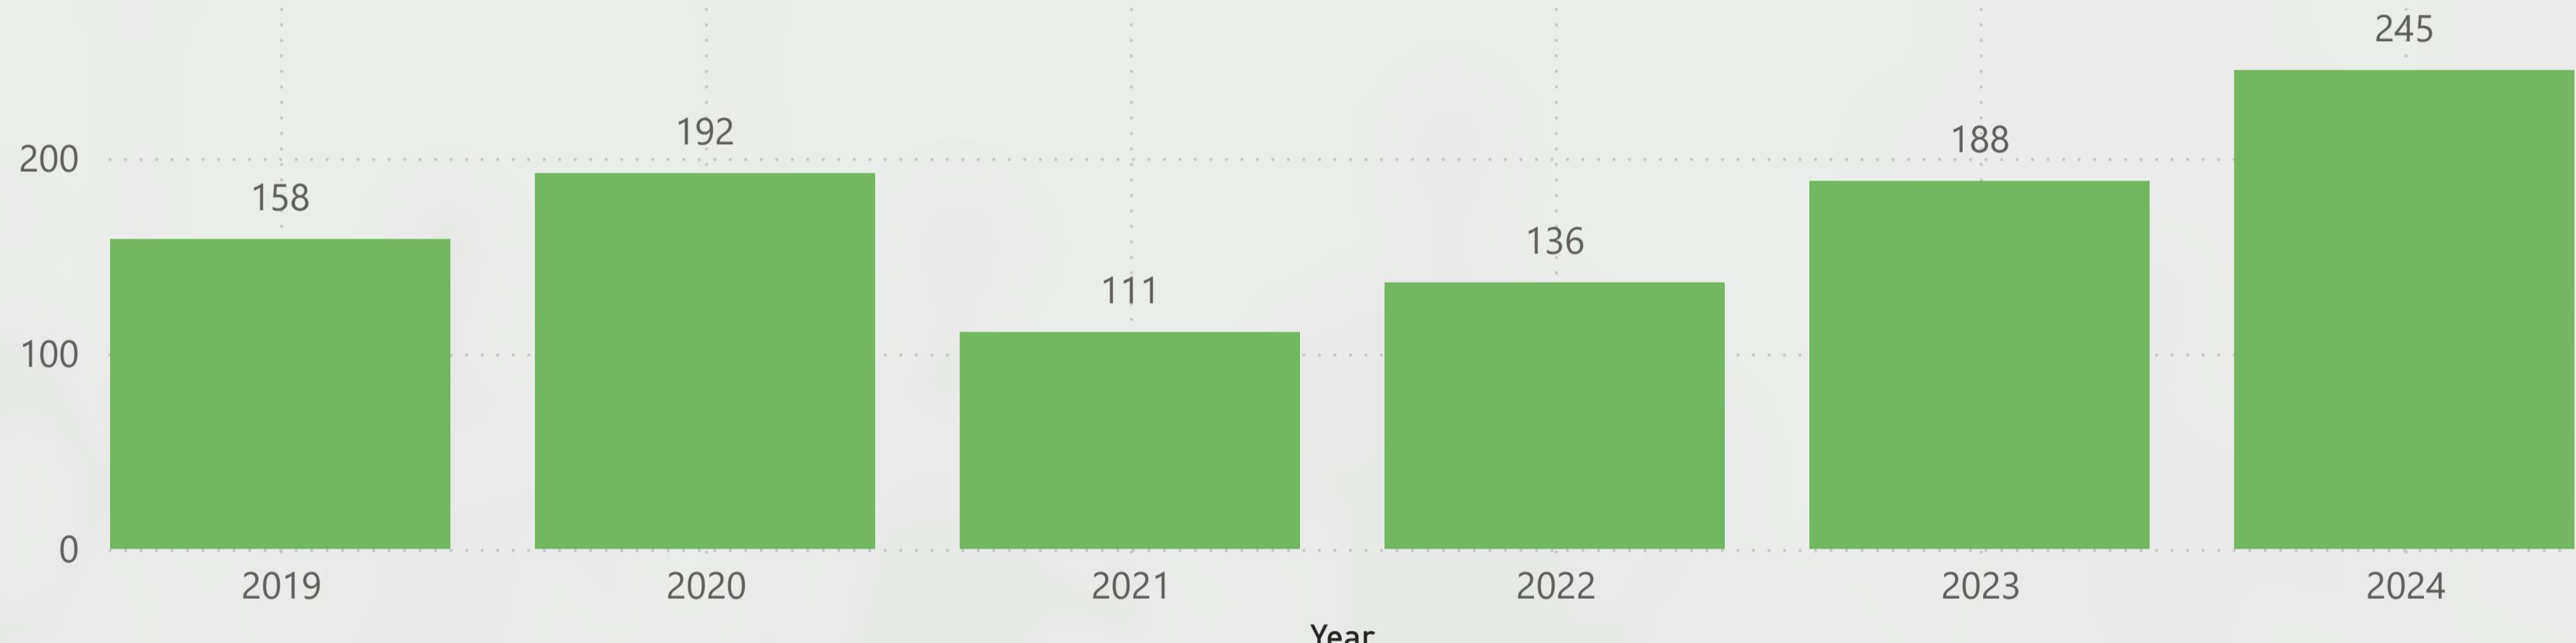

Our Average field has increased steadily and in line with other events findings parkrun is back above 2020 levels. The average attendance of 245 was made up of 5 events under 200 and 5 events over 300, the remaining 43 being between 200 and 299.

Age Grade is something that as an individual people often look to either maintain or increase, but at an event level a decrease shows that more people are undertaking parkrun. A steady decrease on 1% shows good event evolution.

In parkrun not every participant "remembers their barcode" the worst day of he year for this is Christmas Day. This year at least three people ran Jesmond Dene parkrun who were not registered and who did not want to register at the finish line (a short form and your barcode is emailed to you, scan that and you're in the club)

Average Volunteers

Runners / Volunteer

Our Hi-Viz Heroes

Jesmond Dene has a tricky winding course so we need a lot of volunteers. Some weeks we get volunteers no problems, other days we do struggle, but the community always comes good for us and we are able to be on.

In 2024 we again continued to support DoE young people. These are always a highlight for the whole core team. Watching young people go from timid, lost children to upstanding young people ready to take those next steps.

Tracking the changes of participants per volunteer really shows the growth of our community, we are using more volunteers, but the ratio shows that the increase in participants supports it.
